

eRetail

COMPREHENSIVE AND INTEGRATED SOLUTION FOR RETAIL INDUSTRY

STOCKIEST/ DISTRIBUTOR MANAGEMENT SYSTEM

bbnisys

SYNERGISE YOUR POTENTIAL

eRetail helps you integrate transactions of multiple locations into one system, seamlessly and effortlessly. On the web, or off the web!

Web-Based

eRetail is fully web-based. The software remains on a central server, with users logging in using a web browser.

Users can access the system from any computer, anywhere in the world. Even by traveling executives and salesmen from home, a client's office, a cyber cafe, or a laptop.

eRetail works efficiently over ordinary dial-up connections. You could, of course, use it over a VPN if you wish, or on your corporate network. Or any combination you like.

Offline

Where a reliable, economical Internet connection is either not available, or not desirable, **eRetail** enables easy integration in an offline and online environment.

eRetail allows companies to integrate some (or all) of the locations into one system by maintaining transactions offline and synchronizing them in batch mode. **eRetail** is the only ERP software that allows offline integration, saving huge costs.

With **eRetail**, your finger remains on the pulse of the entire organization, all the time. This drives costs and inefficiencies down, and identifies trends faster. incrementally.

Consolidation

You can integrate accounting for an unlimited number of Branches, Divisions, and Profit Centers. These can be grouped as required, and all reporting can be individual, grouped, or instantly consolidated across the enterprise.

Maximizing Profits

Most important, **eRetail** helps maximize profits in several ways. Integrated systems, real time information across the enterprise, tight controls, absence of slackness etc result in increased efficiencies, reduced costs, higher productivity and profitability. Besides, **eRetail** offers a light footprint and demands light infrastructure resulting in a comparatively much lower total cost of ownership. **eRetail** would be the most cost effective solution for any enterprise, compared to any other ERP solution. **eRetail** is comprehensive software for Stockiest and Distributors. **eRetail** is the software of option for companies wanting to standardize a single system across its supply chain for the great value it offers to both the distributors and the company itself. Not like any other software, **eRetail** offers real value to the Stockiest, Distributor. It helps the Stockiest, Distributor immensely in increasing the efficiencies of his own business, reducing costs and maximizing profits. This makes it easier for companies in deploying standard systems across all Stockiest, Distributors.

eRetail Features at a Glance:-

Can automate all operations of Stockiest/ Distributors including billing (with or without bar codes), collections, receivables & payables, inventory management, financial accounting, ordering etc. The distributor does not require any other software to manage his accounts etc. **eRetail** can work for any number of product lines, godowns, warehouses, businesses and principals.

Helps manage promotional schemes of all kinds, incentives, claims etc tightly integrated with billing, inventory and accounting.

Can generate critical analysis and reports of sales (primary & secondary), promotional schemes performance, inventories, salesmen productivity, etc

Can transmit reports to principal company over the internet

Be learnt and used within a very short time - a few days.

Offers huge control to the principal company on ability of distributors to change product masters, price lists, promotional schemes to enable uniformity across the supply chain.

Huge flexibility in usage - allowing existing business practices to be automated without distributor having to change his processes.

Is VAT ready.

Valuable tools like Report Writer, Forms & Invoice Designer etc help distributors and companies adapt the software to new, evolving and varied requirements.

Useful features like auto uploading of product masters, price lists, promotional schemes, orders etc send by principal companies over the Internet.

Key Benefits:-

eRetail with the Stockiest/ Distributor offers him great value. These include:

Computerization of the entire business. No part of the business is outside the scope of the software. Includes integrated financial accounting, taxes, Bank reconciliation etc.

Superior billing leading to increased efficiency

Reduction in inventory costs, on account of superior inventory management, control on pilferages, management of slow moving goods and idle stocks etc

Reduced receivables on account of superior receivables management

Reduction in costs on account of tight financial management, integrated and instant accounting.

Quicker settlement of claims with principal company on account of automated claims management.

Higher sales on account of superior billing, automated management of promotional schemes etc

Maximized profits, resulting from above.

Superior relationship with principal company.
